

Lab 1: Linear transformations

Nataliia Vytska, SEBA28

MATH252 Group 2

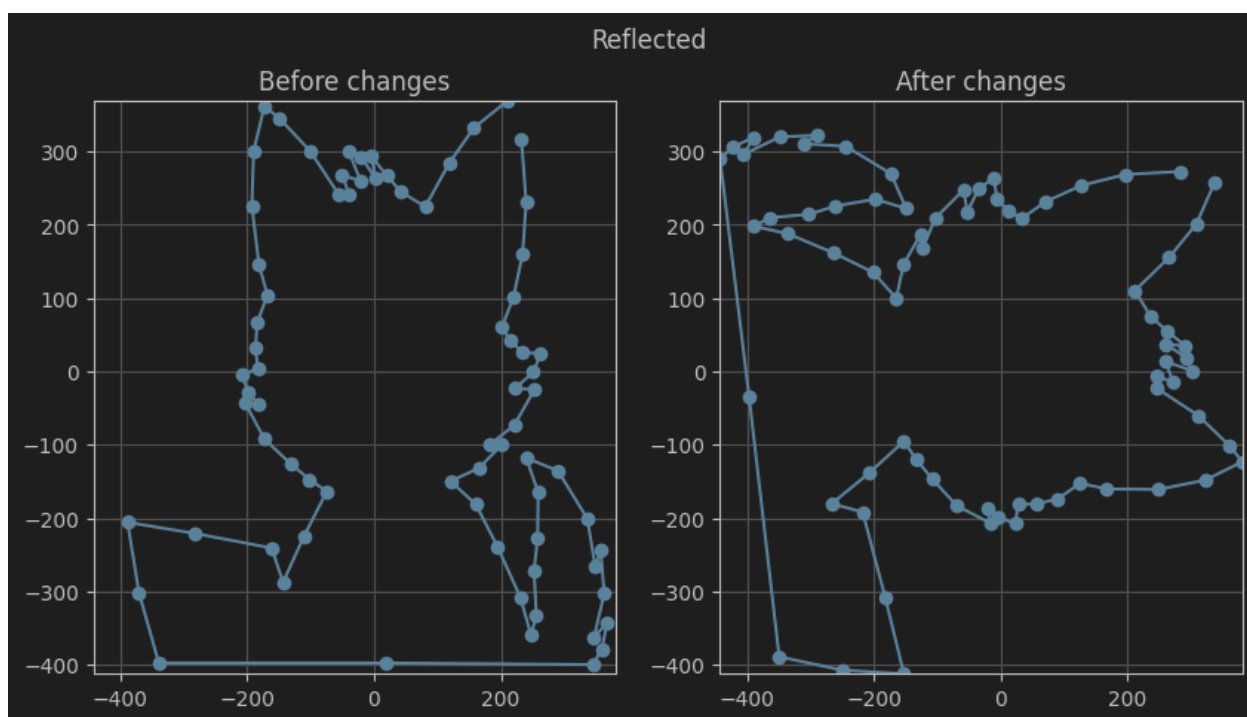

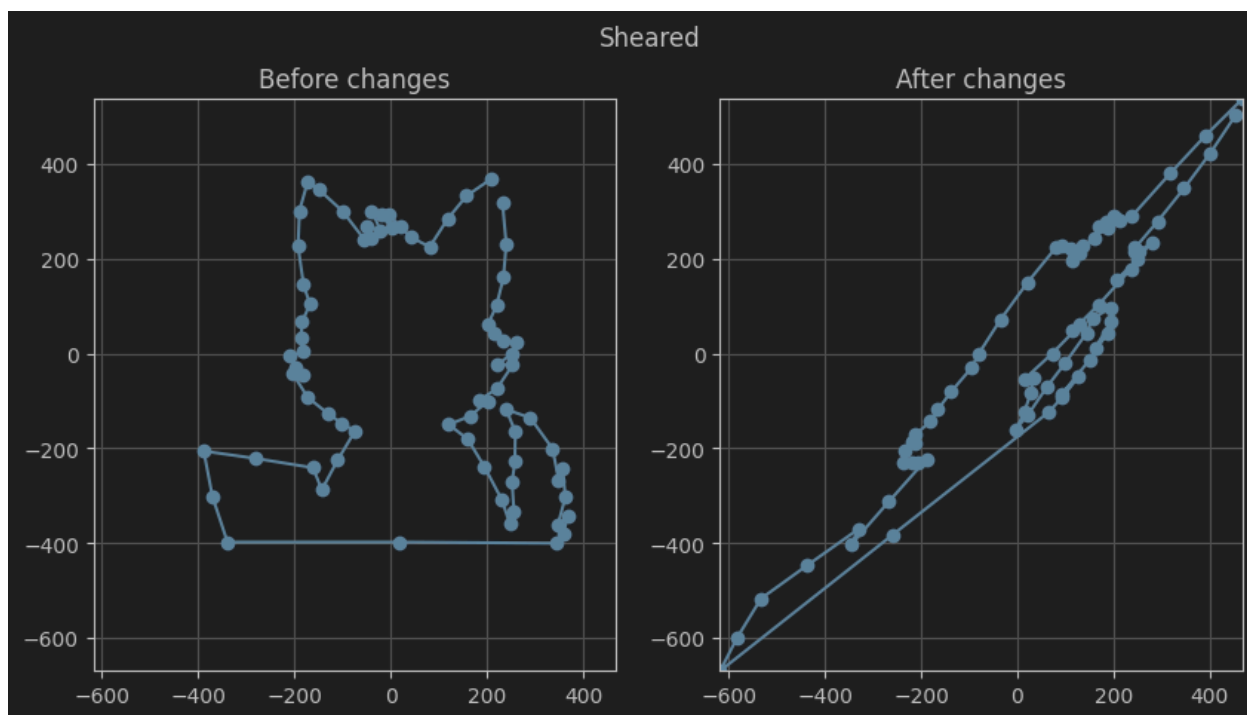

Link on repo: <https://github.com/nvytska/lab1-linear-transformations>
There you will find code in files and answers on theoretical questions.

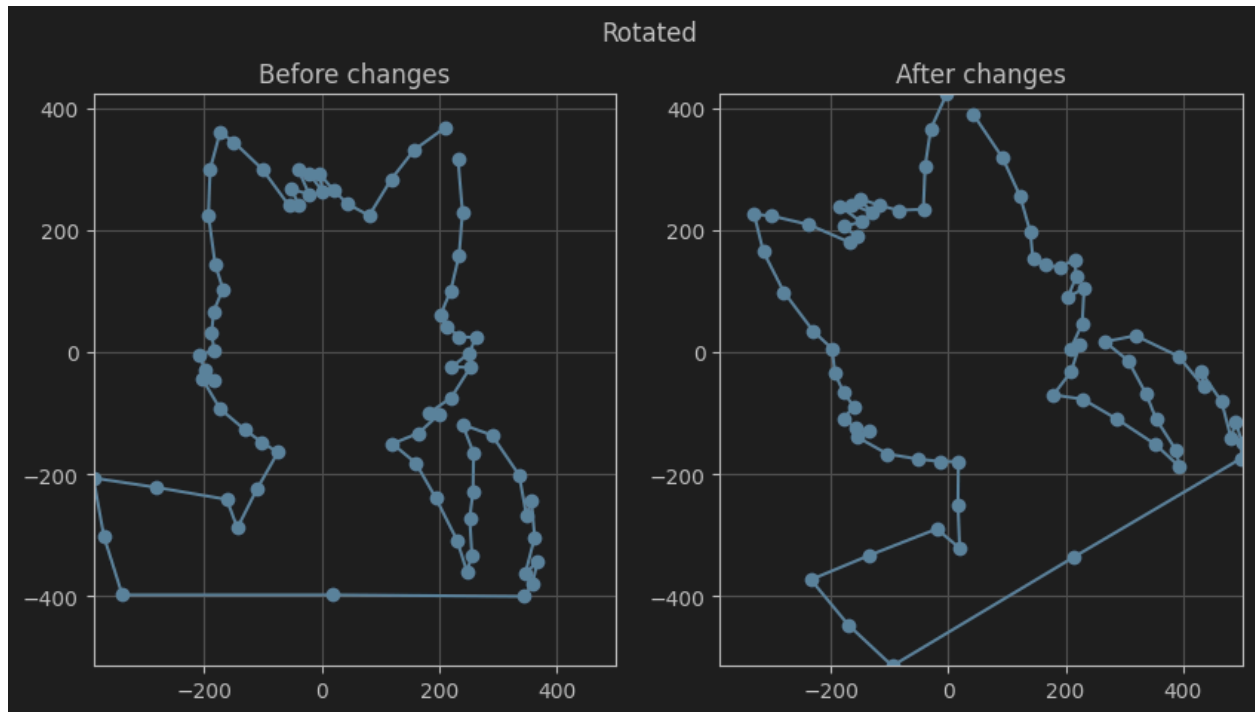

Results of tasks:

Task 1.

Applied transformations on lynx

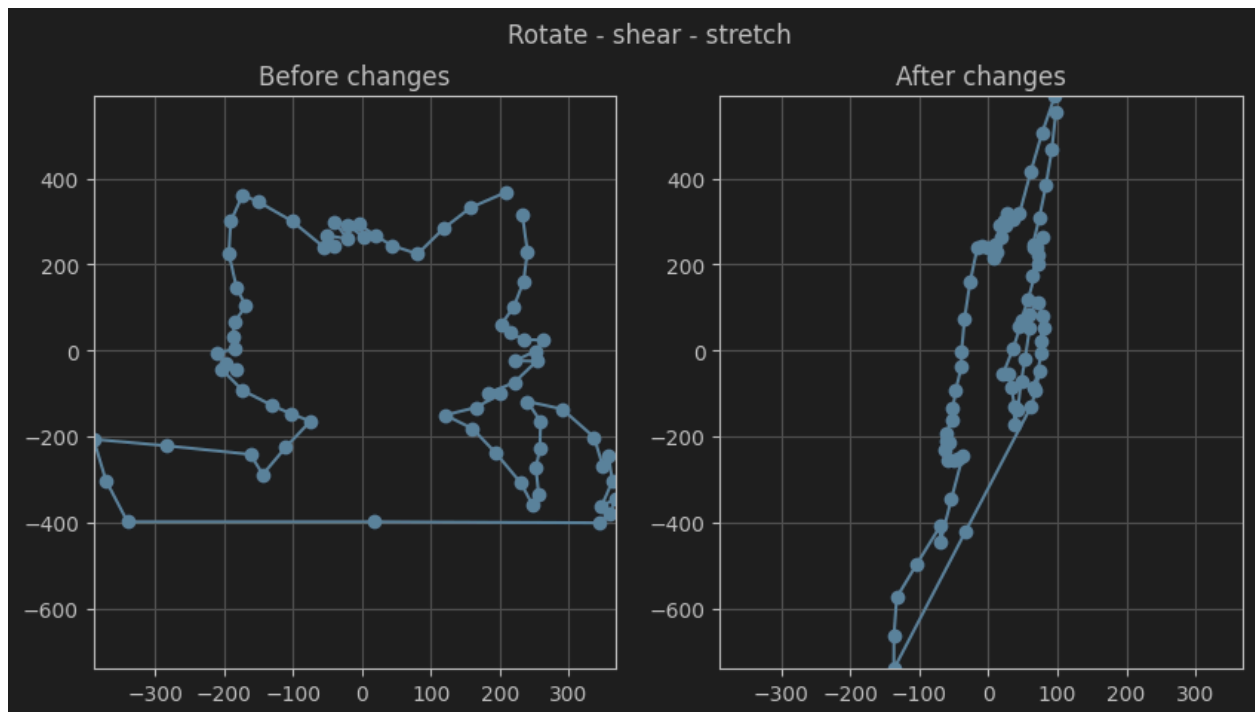

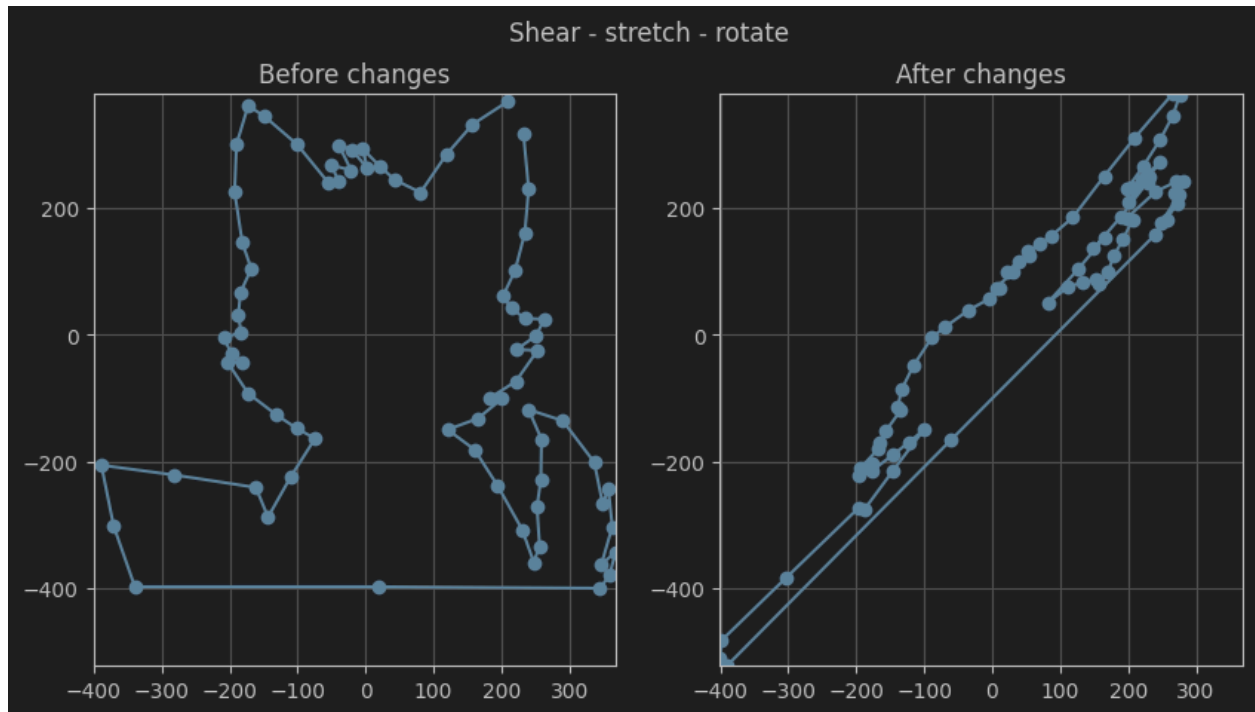

Task 2.

All results are different because matrix multiplication is not commutative, changing the order of transformations changes the final result.

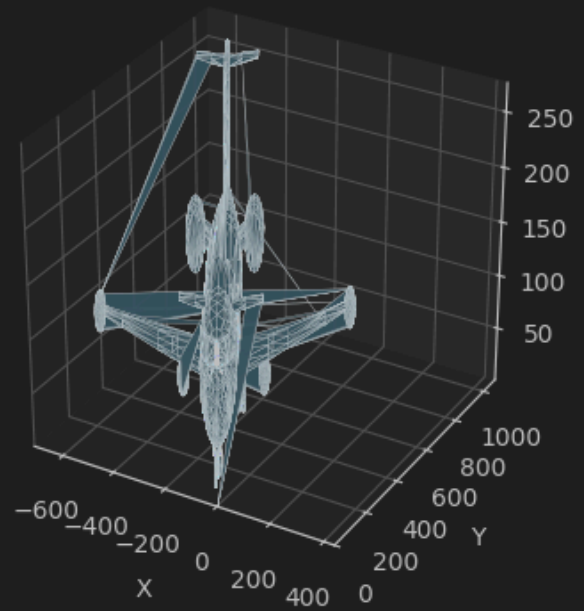

Task 3.

Rotated XY

Before changes

After changes

Rotated YZ

Before changes

After changes

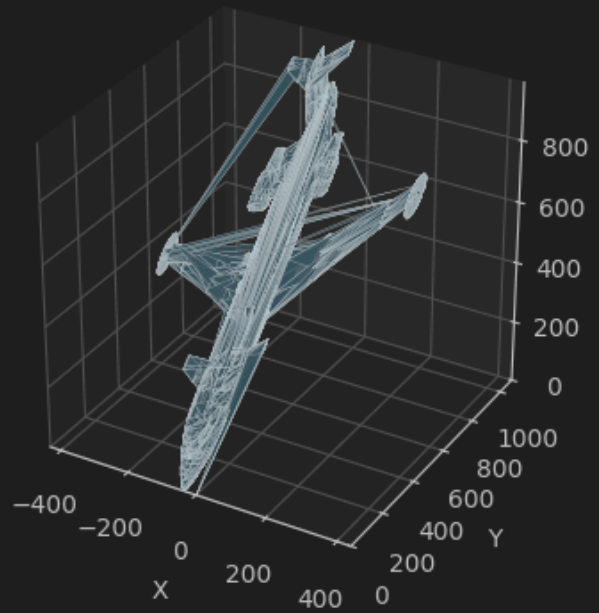

Rotated XZ

Before changes

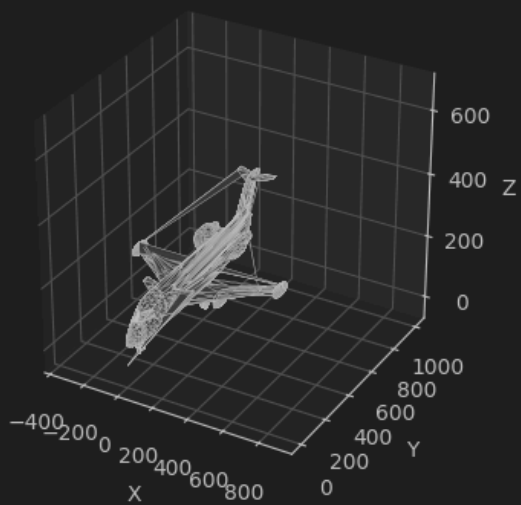

After changes

Task 4.

Task 4: Combined rotation

Before changes
